HECKER SHANNON

SENIOR PRODUCT DESIGNER | LONDON, UK

Senior Product Designer with 10+ years delivering high-impact design work across complex financial products and AI-powered design tools. Strong track record of raising the craft bar, mentoring designers, and shaping product direction across multi-squad environments in close partnership with product, engineering, and business leadership.

EXPERIENCE

2026 – Present

ausōs.ai

Founder & Product Designer

Conceived and designed an AI-powered visual web builder from 0→1. Led product strategy, Design Thinking user research, complex interaction design and end to end brand identity creation.

Barclays, London

Senior Product Designer

2025 – Present

FX and MarketsOne

- Set design vision across multiple squads on the FX and MarketsOne platform, navigating complex tradeoffs and shipping polished experiences across web and native surfaces.
- Raised the craft bar through critique and mentoring, coaching designers to consistently produce thorough, high quality work.
- Spearheaded an AI assisted design system, integrating automated component generation, token management, and accessibility checks to forge a unified visual language.

J.P. Morgan, London

Vice President, Product Design

2023 – 2025

Fusion Platform Suite

- Fusion Analytics Dashboard: Led end to end design across complex financial product areas, shipping high craft experiences that drove real outcomes for expert users at scale.

shannonhecker.com

- Fusion Universal Design System: Built a tokenised component library across Markets UX teams, establishing interaction standards adopted across multiple squads.
- Fusion Data Solution: Navigated ambiguous multi-stakeholder problems, framing design strategy and influencing roadmap decisions alongside product and engineering leadership.

2019 – 2023

Security Service products

- ETF Instruct: Redesigned trading workflows with APAC leads, reducing friction and improving accuracy for high volume orders.
- Complex Assets and CAM: Streamlined valuation and position tracking tools for complex security types.
- Corporate Action Manager: Simplified compliance-sensitive workflows, improving usability for a large operations team.

DXD Microsite and Marketing Materials

- Designed and launched an internal UX microsite for front-office and middle-office stakeholders, raising the profile of the UX discipline across the business.

DXD UI Toolkit and Brand Guidelines

- Evolved an internal component library into a scalable design system serving multiple cross-asset teams, reducing design overhead and accelerating delivery.
- Led stakeholder workshops to align UI patterns across asset classes and maintain brand integrity.

2016 – 2019

JPMM Execute Trading platform

- JPMM FX, RaaS and Algo Center: Modernised legacy trading tools, improving workflow speed and accuracy for FX traders.
- Bento Design Library: Established shared UI foundations enabling consistent, scalable cross-asset development.
