

HECKER

SHANNON

SENIOR PRODUCT DESIGNER | AI & COMPLEX WORKFLOWS

Product Designer with 15 years in design, 10 designing the tools behind trading floors. Nine years at J.P. Morgan, ending as VP Product Design on the Fusion platform, where I designed complex workflows and dense data interfaces for institutional clients. Now at Barclays, running the design system across FX and MarketsOne and the AI tooling that helps the team ship faster. Building ausōs.ai on the side, an AI design-system builder in private alpha.

SKILLS

- Complex Workflows & Decision-Support Systems
- Conversational and Agentic AI
- Large Dataset Visualisations
- Information Architecture & Framework Patterns
- AI Product Design
- Design Systems (Figma Advanced)
- User Research & Usability
- Mentorship & Design Critique

EDUCATION

London Metropolitan University
MA in Digital Media, 2015–2016

Ling Tung University, Taiwan
BA in Digital Media Arts & Management, 2008–2010

EXPERIENCE

2026 – Present

ausōs.ai Designer + Builder

AI design-system builder I'm building solo. UI Kit plus a Builder that turns prompts into UIs across Salt, Material 3, Fluent 2, Carbon, and the ausos system. Currently in private alpha with early testers across design teams, built on Claude and Next.js, edge-rendered.

2025 – Present

Barclays, London Senior Product Designer

FX and MarketsOne

- Spearheaded an AI-assisted design system, integrating LLM tooling and automated workflows into the design process and shipping framework-level patterns across web and native platforms.
- Led end-to-end design across a complex B2B trading platform, designing for expert users making real-time decisions with dense data, with focus on trust, clarity, and decision confidence.
- Mentored designers, ran design critique, and set quality standards, coaching the team on AI tooling adoption and how to design alongside agentic systems.

2016 – 2025

J.P. Morgan, London Vice President, Product Design

Fusion Platform Suite

- Fusion Analytics Dashboard: Designed complex B2B data platform for institutional clients, translating technical financial data into clear, actionable interfaces for expert users making high-stakes decisions at scale.

SENIOR PRODUCT DESIGNER | UK | SHANNON HECKER

- Fusion Universal Design System: Built a scalable tokenised component library adopted across multiple product teams, establishing interaction standards and visual patterns that unified a fragmented platform ecosystem.
- Fusion Data Solution: Owned design across ambiguous, technically complex product areas, partnering with engineering leadership to shape feasible solutions within real architectural constraints.

Security Service products ↗

- ETF Instruct: Redesigned trading workflows with APAC leads, reducing friction and improving accuracy for high volume orders.
- Complex Assets and CAM: Streamlined valuation and position tracking tools for complex security types.
- Corporate Action Manager: Simplified compliance-sensitive workflows, improving usability for a large operations team.

DXD Microsite and Marketing Materials

- Designed and launched an internal UX microsite for front-office and middle-office stakeholders, raising the profile of the UX discipline across the business.

DXD UI Toolkit and Brand Guidelines

- Evolved an internal component library into a scalable design system serving multiple cross-asset teams, reducing design overhead and accelerating delivery.
- Led stakeholder workshops to align UI patterns across asset classes and maintain brand integrity.

JPMM Execute Trading platform ↗

- JPMM FX, RaaS and Algo Center: Modernised legacy trading tools, improving workflow speed and accuracy for FX traders.
- Bento Design Library: Established shared UI foundations enabling consistent, scalable cross-asset development.
